

## 2012 Highlight Reel

2012 has been an exciting year at CEP with many exciting projects successfully completed and relationships cultivated. A big thank you to our collaborators, partners, and providers, for your ongoing support.

In the New Year, we will be busy leading innovative projects of great importance and impact (*see 2013 projects below*), and we will be reaching out to our supporters. Look out for opportunities for getting involved and providing feedback!

From all of us at CEP, warm wishes for a safe & happy holiday season!

Kind regards,  
Tupper Bean  
*Executive Director*

## 2012 Project Highlights:

### ***Provincial Knowledge Translation Strategy and Implementation***

Funder: Ontario Renal Network

- CEP is helping the Ontario Renal network (ORN) to create a program strategy for the early detection (screening) and management of Chronic Kidney Disease (CKD) as well as execute the subsequent strategic plan. To date, CEP has worked with ORN to design and implement a pilot mentoring/shared care program in Ontario to link primary care providers to nephrologist specialists to build collaborative relationships and increase access to nephrology support in order to ensure better care for patients in Ontario. In addition, CEP is currently assisting ORN with designing an EMR pilot program to test point of care tools to better enable evidence-based screening, management and referral of CKD patients.

### ***Integrated Cancer Screening Strategy Implementation***

Funder: Cancer Care Ontario

- Cancer Care Ontario's (CCO) Integrated Cancer Screening strategy (ICS) is undergoing program redesign to emphasize prevention and enhance family health care screening. The ICS strategy integrates existing breast, cervical, and colorectal cancer screening guidelines into primary care to support patients, providers, and health system planners in improving the quality and uptake of screening.

- CEP has been engaged by CCO to develop, test and disseminate, including the engagement of key stakeholders, the highest quality preventive screening tools for providers, positively influencing health outcomes in the province of Ontario.

### ***EMR Implementation Support***

Funder: Hamilton Family Health Team

- The Hamilton Family Health Team (HFHT) has engaged the Centre for Effective Practice (CEP) to provide implementation support for Chronic Non-Cancer Pain (CNCP) EMR modules for two vendor user groups: Bell and Practice Solutions Suite. This project supports the Quality Improvement plans at various practices at HFHT to better provide evidence-based care for their patients with CNCP. This work builds upon a previous pilot project CEP conducted with eHealth Ontario, the Core Care practice of HFHT and its EMR vendor Xwave/Bell in which CEP developed and implemented a process to integrate CNCP clinical practice guideline recommendations into their EMR.

### **Three 2013 Projects to Watch for:**

#### ***Integrated Cancer Screening Strategy Implementation***

Clinical Tools Needs Assessment

funder: Cancer Care Ontario

#### ***Provincial Low Back Pain Primary Care Provider Education***

funder: MOHLTC

#### ***Strategy for Clinical Guidance Development for the Clinical Care Community during an Influenza Pandemic***

funder: Public Health Agency of Canada
