

KT in PC in the works!

Our knowledge support services team is working on four major tools and resources as part of the Knowledge Translation in Primary Care Initiative in addition to creating a Poverty tool for each province.

Three upcoming tools and resources include Adult Mental Health, Chronic Insomnia and Chronic Non-Cancer Pain. We are also working on a Medical Assistance in Dying (MAID) resource, which is intended to supplement latest processes according to the new legislation. [Read more.](#)

Our board's on board in primary care

Our board has been working tirelessly to contribute to our strategic plan and provide leadership to CEP. On top of their roles as board members and their busy lives, they still find time to stay committed to improving the quality of primary care.

Our very own Dr. [David Price](#) is working with [Hugh MacLead](#) to contribute to [Longwoods' Open Letters](#) on "Primary Health Care: It's Time for Disruptive Innovation" to be published in October. Dr. Price will also speak about his experience in the Health TAPESTRY project at the [Accelerating Primary Care](#) conference in late November.

Waterloo Wellington eReferral platform

The Centre for Effective Practice has partnered with [Think Research](#) and [CognisantMD](#) to support System Coordinated Access to design and implement an electronic referral platform for the Waterloo Wellington region.

Through the platform, health care providers will be able to submit eReferrals directly from their EMR allowing clinicians to share patient information in real time. eReferrals will be an important part of a seamless electronic health record and improve completeness and appropriateness of referrals made to specialists, programs and services. Our tools travelled to the NPAO conference last weekend

We've kicked off our fall conferences with the [NPAO annual conference](#) at the Sheraton Centre Hotel

in Toronto. The largest gathering of Nurse Practitioners in Canada with over 450 delegates in attendance.

While exhibiting, we met with nurse practitioners and shared several tools including our Neck and Headache, Preconception, Poverty, and Preventing Childhood Obesity tools as well as a prototype of our Pharmacological and Non-Pharmacological Options for Managing Chronic Non-Cancer Pain tool, which is currently under development.

Thank you to NPAO for an introduction to fall conference season and to all those who visited our booth and picked up our tools. See our tools at the following upcoming conferences: [Health Quality Transformation](#) (Oct. 20, 2016) and the [Annual Scientific Assembly](#) (Nov. 24 - 26, 2016).

Our partnership with CFPC

To support our work, we are now in an exciting alliance partnership with the College of Family Physicians of Canada (CFPC) to collaborate on the development and implementation of practice support programs, tools and resources aimed at assisting family physicians in their everyday practice across Canada. Our newest tool: Neck Pain and Headache

This summer, we launched our Neck Pain and Headache tool for primary care providers. See it [here](#).
